October 6, 1970

Mr. Mark Madson
Office of the Attorney General
State Capitol Building
Salt Lake City, Utah

Dear Mr. Madson:

With reference to the Morgan County problem, I am advised that the total acreage sold was 1,886 acres, which is as follows: 142 acres irrigated ground, 184 acres dry farm, and the balance is hill land.

They have sold with the property 42 shares of Littleton Canal, 29 shares of Deep Creek water; one share being equal to approximately 2-1/2 acre feet, and the bulk of the water being spring and early summer water. All of the water comes from Deep Creek which stands to run dry, or virtually so, at the end of the season.

Sincerely yours,

C. C. Patterson
